Emissions reduction targets

In order to continue our progress to achieving Net Zero, we have adopted the following carbon reduction targets.

We project that our Scope 1 and 2 carbon emissions will decrease over the next five years to 4 tCO₂e by 2027. This is a reduction of 20%.

In addition we have set the below Carbon reduction targets:

- Reduce absolute carbon emissions by 2.5% by 2027
- Reduce business travel carbon emissions by 10% per capita by 2027.
- Reduce energy use per square metre by 10% by 2027
- Purchase 50% of purchased electricity (1.3 tCO₂e) from verified renewable sources by 2027.
- Reduce consumption and waste with 60% waste generated recycled to reduce landfill
- Reduce single use plastics, packaging and increase recyclability of products by 90%
- Reduce energy usage over the next 5 years by 5% through increased staff awareness, and LED lighting replacement.
- Reduce scope 3 emissions by 10% through increased home working, remote delivery, use of other forms of transport, public transport, car share, electric vehicles
- Use of online resources instead of printed materials wherever possible
- Exploring the introduction of a salary sacrifice electric vehicle scheme to support employees to access electric vehicle more cost effectively and support staff to reduce their own carbon emissions.
- Source 100% materials from and manufacture products within the UK to reduce carbon emissions and improve supply chain transparency by 2027
- Biodiversity initiatives developed or supported in the PA local area
- Due diligence to be carried out on 100% supply chain suppliers to ensure they have a clear and timebound commitment to sustainability and carbon reduction

Our Carbon Reduction will be reviewed and updated annually, with SMART targets to reflect changes in our organisational structure and to take account of the efforts made to reduce our emissions over time.

Kaizen will report our progress annually through published progress reports and continued carbon emissions reporting through the Evergreen Supplier Assessment once this becomes available for benchmarking and reporting progress against the requirements detailed in the Net Zero Supplier Roadmap.
